

**IN THE CLAIMS:**

**Please cancel claims 1-19**

**Please amend the claims as follows:**

20. A culture device having an affinity for protein, which is used for inducing immunosuppressive cells by culturing human cells in said device.

B1  
21. The culture device of Claim 20, wherein prior to said culturing the device is [previously] coated with one or more cytokines and/or one or more antibodies against cell surface antigens.

22. The culture device of Claim 20, wherein prior to said culturing the device is [previously] coated with two or more antibodies against cell surface antigens, each of said antibodies recognizing a different epitope.

23. The culture device of Claim 21 [or 22], wherein said antibodies [the antibody] against cell surface antigens are [is] anti-CD2 antibodies [antibody] or anti-CD3 antibodies [antibody].

24. The culture device of Claim 23 or 25, wherein [one or more antibodies that recognize different epitope are] the anti-CD2 antibody is TS2/18 produced from hybridoma HB195 (ATCC Accession number HB-195).

**Please add new claim 25:**

B2  
25. The culture device of Claim 22, wherein said antibodies against cell surface antigens are anti-CD2 antibodies or anti-CD3 antibodies.
